

# Merging Advanced Laparoscopic and Ultrasound skills in Endometriosis

**WEDNESDAY 14<sup>TH</sup> JULY 2021**

**Workshop Chairs: George Condous & Michael Wynn Williams**

**0730 - 0800 Registration, arrival tea & coffee**

0800 – 0805 Welcome – **George Condous**

0805 – 0830 Development of ultrasound as a tool to diagnose endometriosis: from soft markers to deep infiltrating endometriosis – **George Condous**

0830 – 0850 IDEA consensus - a road map to performing endometriosis imaging in a systematic way – **Mercedes Espada**

0850 – 0910 Diagnosis is therapy: is ultrasound more than a diagnostic tool? – **Mathew Leonardi**

0910 – 0930 #ENZIAN system: from surgery to ultrasound – **Gernot Hudelist**

0930 – 0950 Correlation between recto-sigmoid endometriosis on ultrasound and laparoscopy – **Kristine Aas-Eng**

0950 – 1010 Can ultrasound be used to predict pelvic sidewall endometriosis and the need for ureterolysis? – **Shannon Reid**

**1010 – 1030 Morning Tea**

1030 – 1050 Doing your own pre-op endometriosis scanning - planning is everything – **Michael Wynn-Williams**

1050 – 1110 Can we use pre-operative ultrasound to predict the laparoscopic skill mix at endometriosis surgery - implementing UBESS – **Mercedes Espada**

1110 – 1130 Setting up comprehensive expert imaging and minimally invasive surgery unit – **Sony Singh**

1130 – 1200 Matching pre-op endometriosis ultrasound imagery with intra-op laparoscopic findings – **Mathew Leonardi & George Condous**

**1200 Close**
